

Automate and Streamline Insurance Application Process using emSigner

At a time when 90% of customers are willing to consider switching insurance service providers for better customer experience, relying on antiquated, time-consuming and off-putting paper based systems for onboarding customers will not help you make the cut.

Why not speed up the whole process and provide the required flexibility by digitizing and automating the entire process using emSigner, a paperless office solution offered by Prestige Saudi Co. Ltd in collaboration with eMudhra. In fact, more than 25 insurance companies in India and around the world are using this paperless office solution to not only revamp insurance application process but also provide better digital experience to customers.

Here are some of the highlights of this new-age paperless office solution:

- Using advanced OCR functionalities, emSigner can extract data from any form or document
- emSigner facilitates efficient and intuitive data entry process using dynamic form entry
- emSigner allows customers to electronically sign and submit insurance applications using built-in KYC document upload facilities
- emSigner integrates with Apache Spark based Machine Learning for building AI based transaction pipelines

Join the emSigner community and experience the difference by connecting with us at [email](#).

Cheers,

Prestige Saudi Co. Ltd and eMudhra
