

emSigner Signer Gateway

Plug-and-play Signing Solution for Your Business

Automate document signing with Signer Gateway as a Service.

Value Proposition

Embedded document signing experience as part of your website or portal (works like a payment gateway)

Seamless integration with any ERP, CRM, accounting or other third-party applications used within an organization

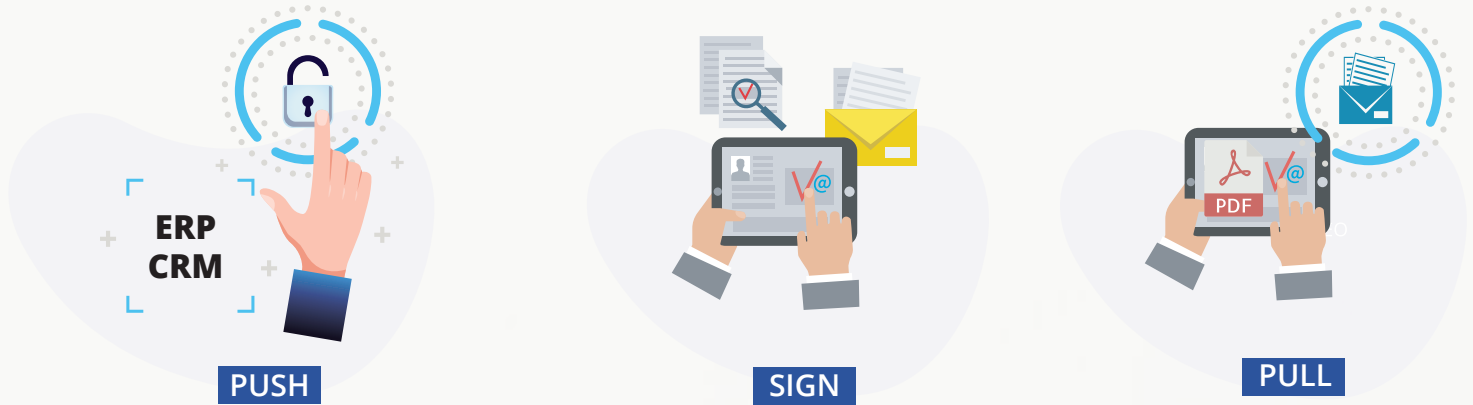

Support for legally valid electronic or digital signatures across the globe

Customizable user interface

How it Works

Select the document within the ERP/CRM/ accounting/other third-party application that you are using and push it on to the emSigner Signer Gateway by clicking on the sign button

Sign the document using legally valid electronic/digital signature of your choice

Automatic retrieval of document as a signed PDF via a one-click process

Trusted By all Kinds of Businesses
